

FileHold Document Management Software announces continued growth

October 7, 2008

Vancouver, British Columbia, Canada;

FileHold Systems Inc. announces continued growth in its International business by: winning new direct customers, establishing new Partner re-sellers and the addition of a key management employee to accelerate international growth.

FileHold software helps companies eliminate paper and organize electronic documents as they move to the "paperless office". FileHold brings affordable software to a neglected market: mid sized business or departments of large companies who want to eliminate file rooms and labor associated with finding information.

From its head office in Vancouver, BC, Canada, FileHold has completed installations in Australia, South Africa, France, United Kingdom, Poland, Romania, Italy, Indonesia, Hong Kong and many customers throughout the US.

To support and strengthen this International business FileHold has created a new position: Director of International Business. Tom Newton has been hired to fill the position. Tom brings more than 15 years of Information Technology sales and marketing experience to FileHold, most recently he worked in the domain of Archive and Records management software which compliments the FileHold offerings. Tom said **"FileHold software has a very rich feature set that surpasses the expectation of most prospects. These features in combination with an intuitive interface, an easy / fast installation methodology make it very attractive to prospects all over the world who are trying to reduce paper consumption and be in compliance with global business practices. I look forward to the opportunity to work with FileHold and strengthen their international presence"**.

Larry Oliver, President of FileHold announced; **"since our inception prospects from all over the world have found the value of FileHold to be compelling. Our business strategy of using the web to market, sell, install and support customers has proven to work and has dramatically reduced the 'total cost of ownership' in this software category. Tom Newton has a proven track record in sales and marketing; his addition to our management team will strengthen our reach internationally and give our partners a higher level of support."**

About FileHold Systems

is a privately owned, Microsoft Gold certified, company that develops and markets Electronic Document Management software. FileHold software is a modern document and record management solution that incorporates powerful, but easy to use, interfaces with bulletproof security and document storage capabilities. FileHold empowers the workers of mid sized businesses, departments of large companies and various levels of Government to create share and collaborate electronically on all of their important documents while maintaining tight version control and managed workflow.
