

## **FileHold Document Management Software to be featured in “.NET for Legal” Seminars sponsored by I-Quest Ltd. in the UK**

April 15, 2008

**Vancouver, British Columbia, Canada;** FileHold'08, advanced document and record management software is to be featured in a series of .NET seminars targeted at the legal market in the UK. The seminars sponsored by FileHold partner: I-Quest Ltd.[www.i-questltd.com](http://www.i-questltd.com) will be held at The Grange City Hotel in London.

The seminars, to be held in May, are entitled: “.NET for LEGAL” and will focus on the benefits of application development and integration of the Microsoft .NET environment. I-Quest will demonstrate how FileHold'08 Document Management software that includes: workflow, scanning, redaction and records archiving policies can be integrated with case management software and much more... all based on .NET

Kevin Mackay, Managing Director of I-Quest, said “This is an opportunity to see and hear what .NET can bring to the Legal business community. There has been much talk about the .NET standard for programming and development; many people want to know if it is relevant to them, does it change anything ... you bet it does. This seminar series is an opportunity to see real-life products, like FileHold document management software, that have been built on the .NET platform and hear why this technology can help you to plan your next information technology lifecycle. I-Quest is bringing UK legal firms a complete new suite of .NET solutions all with full SharePoint integration.”

Larry Oliver, President of FileHold said; “FileHold was built from the ground up based on the Microsoft .NET framework including ASP.NET, for high-performance and interactive Web-based applications. The .NET framework gives FileHold tight integration with Microsoft Office, Microsoft Active Directory and Microsoft SharePoint. The FileHold Web Services API allows for connectivity to 3rd party applications that are found in the Legal Industry. I-Quest has years of experience in the Legal marketplace working with several industry specific applications. FileHold is pleased to have them as a partner taking our document management software to market in the UK and Ireland.”

### **About FileHold Systems**

is a privately owned, Microsoft Gold certified, company that develops and markets Electronic Document Management software. FileHold software is a modern document and record management solution that incorporates powerful, but easy to use, interfaces with bulletproof security and document storage capabilities. FileHold empowers the workers of mid sized businesses, departments of large companies and various levels of Government to create share and collaborate electronically on all of their important documents while maintaining tight version control and managed workflow.
