

# *.NET for LEGAL*

*An opportunity to see and hear what .NET can bring  
to Legal*

*There has been much talk about the .NET standard for programming and development, many people want to know whether it is relevant to them, does it change anything, you bet it does. So now there's an opportunity to see some real-life products that have been built on the .NET platform and hear why they can help you to strategically plan your IT for the next lifecycle.*

*I-Quest Limited have been busy behind the scenes preparing to bring Legal firms a complete new suite of .NET solutions all with full SharePoint integration.*

*I-Quest would like to extend a special invite to you to attend the public launch to Legal of their new suite,*

*Hear the views of a high profile innovative Legal IT Director*

*What is Microsoft's view for Legal*

*Do you want to see these products in action?*

*Then come along for 2 hours to:-*
